

Flags

There are nine flags.
Each one has a value, 1 through 9.
Which flag has which value?

Note: Every number corresponds to only one flag.

$$\text{Flag} + \text{Flag} = \text{Flag} \times \text{Flag}$$

$$\text{Dragon} \times \text{Dragon} = \text{Dragon}$$

$$\text{Dragon} + \text{Flag} = \text{Flag}$$
